What's New Summary

September 2011 : **MAINTelligence** Version 4.5 Released

Design Maintenance Systems Inc. is pleased to announce the release of version 4.5.

This new release of MAINTelligence™ features:

- **Security & Database**—MAINTelligence's security and database structure has been modified to allow more transparency of transaction movements, purchase order notes. It also now permits referencing supplier part information to B.O.M. equipment.
- **Parts & Procurement**—increased options for supplier part searches, editing part transactions and information listings.
- **Work Orders**—Lubrication work orders are now editable and have validation requirements to ensure correct information upon editing.
- **Commtest vbSeries, vb7 and vb8 data collectors**—drivers are now available to support data collection into MAINTelligence.
- **UE Systems Ultraprobe 15000 Touch**—a driver is now available to support data collection into MAINTelligence.

NOTE: The first time using MAINTelligence version 4.5, users can expect to see a notice that the database will be updated to incorporate the new changes.

Our support team will provide a live on-line demonstration of the new features upon request. Please email support@desmaint.com or call +1.604.984.3674 to arrange a time. A more detailed What's New document is available through support.
